

# BERMUDA TRIANGLE CHALLENGE

1 MILE | 10K | HALF/FULL MARATHON

## Challenge with Marathon TRAINING PLAN

Jeff Galloway's Training Plans incorporate walk breaks to allow virtually anyone to complete a distance event.

For more information on training, get Jeff's books from [www.JeffGalloway.com](http://www.JeffGalloway.com). YEAR ROUND PLAN & GALLOWAY'S MARATHON FAQ are highly recommended for those new to running or interested in improving their running, but many other titles are available. Please also consider inexpensive coaching via Galloway Customized Training or direct e-coaching from Jeff. More information is available at [www.JeffGalloway.com/galloway-coaching](http://www.JeffGalloway.com/galloway-coaching) or by contacting [Chris@Jeffgalloway.com](mailto:Chris@Jeffgalloway.com).

**Run-Walk-Run (R-W-R):** Jeff Galloway's method has allowed hundreds of thousands of beginners to finish 10K races and longer distances. By inserting a walk break from the beginning of the workout, and continuing to walk according to a plan, there is no need to experience extra fatigue, pain, or injuries. A standard pattern for those who are taking their first running steps is to run for 5-10 seconds and walk for the rest of the minute. If all goes well, you could increase during the third week to 10-20 seconds of running, walking for the rest of the minute. On the 5th week, increase to 20-30 seconds of running while walking for the rest of the minute—if all is well. If you are huffing and puffing, experiencing aches and pains, or struggling in any way, drop back to more walking, such as 10 or 5 seconds each minute.

**R-W-R Strategy for those already running:** The amount of running and walking is adjusted for the pace per mile. Beginning runners should continue running 10-20 seconds every minute for most of the long runs. Those who have been running for at least 3 months could use the following as a guide:

18 min/mi (11 min/km): run 5sec/walk 30 sec	12 min/mi: run 60 sec/walk 30 sec
17 min/mi: run 10 sec/walk 30 sec	11 min/mi (7 min/km): run 60 sec/walk 30 sec
16 min/mi (10 min/km): run 10 sec/walk 30 sec	10 min/mi (6 min/km): run 90 sec/walk 30 sec
15 min/mi (9 min/km): run 15 sec/walk 30 sec	9 min/mi: run 2 min/walk 30 sec
14 min/mi: run 30 sec/walk 30 sec	8 min/mi (5 min/km): run 4 min/walk 30 sec
13 min/mi (8 min/km): run 30 sec/walk 30 sec	7 min/mi (4 min/km): run 6 min/walk 30 sec

**Magic Mile:** On short run weekends as indicated, run a timed mile (after a gentle warm-up) using the run/walk strategy you like best. Use the calculator at [JeffGalloway.com/training/magic-mile](http://JeffGalloway.com/training/magic-mile) for help determining your recommended training and racing paces.

**Making up Distance:** Walk the difference between your longest recent run and the assigned distance to get safely to your assigned distance. For example, if the assigned distance is 9 miles, and you have run 4 miles, you can walk 5 miles then run/walk 4 miles to get on target safely.

XT = cross training. Choose something you enjoy that gives you a good cardio workout. Walking is always good cross training.

Rehearsal Walks - A long walk the day before your longest runs will prepare you for the demands of the Bermuda Triangle Challenge without creating too much fatigue to run the next day's run.
